DAILY ONLINE ACTIVITIES SUMMARY

Date:	**20/06/2020**	**Name:**	**Deepa**
Sem & Sec	**8th Sem**	**USN:**	**4AL16CS029**
Online Test Summary			
Subject	**- -**		
Max. Marks	**- -**	**Score**	**- -**
Certification Course Summary			
Course	**Complete Python 3 Course for Beginners**		
Certificate Provider	**udemy.com/**	**Duration**	**18 hrs**
Coding Challenges			
Problem Statement: 1) Write a C Program to rotate an array by K positions.			
Status: Completed			
Uploaded the report in Github	**Yes**		
If yes Repository name	**Daily_report**		
Uploaded the report in slack	**yes**		

Online Test Details:

- -

Certification Course Details:

- [x] 81. Login logic
  12min
- [x] 82. Web.py sessions
  11min
- [x] 83. Logout functionality
  5min
- [x] 84. Posting microblogs
  9min
- [x] 85. Retrieving post objects
  6min
- [x] 86. User settings and updating Mongo
  18min
- [x] 87. Relative datetimes
  3min
- [x] 88. Making our post dates pretty
  3min
- [x] 89. Adding post comments
  14min
- [x] 90. Image uploads and avatars
  22min

Section 10: Project #6 - Django Web Framework
0 / 11 | 1hr 5min

- [x] 91. Django project setup
  6min
- [x] 92. Creating our blog app
  9min
- [x] 93. Setting up the admin site
  6min
- [x] 94. URLs and views
  4min
- [x] 95. HTML templates
  2min
- [x] 96. Dynamic template data
  6min
- [x] 97. Single post page
  6min
- [x] 98. Implementing Bootstrap
  3min
- [x] 99. Static files
  4min
- [x] 100. Template inheritance
  10min
- [x] 101. Post images, multi-level templates, and more
  9min

Coding Challenges Details:

Program 1:

```
#include <stdio.h>
void rightRotate(int A[], int k, int n)
{
                                int aux[k];
                                for (int i = 0; i < k; i++)
                                      aux[i] = A[n-k+i];
                                for (int i = n-k-1; i >= 0; i--)
                                      A[i+k] = A[i];
                                for (int i = 0; i < k; i++)
                                      A[i] = aux[i];
                                for (int i = 0; i < n; i++)
                                      printf("%d ", A[i]);
                                printf("\n");
}
void main()
{
                                int A[50],k,n;
                                printf("Enter the size of array :\n");
                                scanf("%d",&n);
                                printf("Enter the array :\n");
                                for(int i=0;i<n;i++)
                                      scanf("%d",&A[i]);
                                printf("Enter number of rotation :\n");
```

```
                scanf("%d",&k);
                rightRotate(A, k, n);
}
```
